

Passwordless, Continuous Authentication™ for Everyone, Everywhere

Frictionless User Experience

Go passwordless & adopt invisible MFA powered by continuous AuthN

Compliance for Cyber Insurance

Reduce premium costs by 20% when using Invisible MFA and Passwordless capabilities

MFA Vulnerability Elimination

Replace vulnerable legacy MFA methods with Passkeys & other FIDO-2 options. Attain 100% MFA adoption.

SSO Breach Mitigation

Don't be the next Okta or Microsoft breach headline. Secure all users, devices, and apps spanning Mac, Windows, and Linux devices.

Modern Authentication Challenges Require a New Approach

SecureAuth's patented behavioral modeling approach to authentication is game-changing to enterprise security.

Only SecureAuth combines and analyzes data from mobile devices, workstations, and browser fingerprints to truly

Arculix Differentiators that Solve Your Pain

Strengthened Security. Delighted Users.

Behavioral-Based Risk Engine

Powered by patented policy-based and AI/ML risk analyzers. Provides the most accurate, real-time risk scores even post-AuthN; based on NIST standards.

Device Trust

Mobile. Desktop. Laptop. Server.
Establish root of trust at the device level.
Exceed ZTA & cyber insurance compliance.

Passwordless Continuous Authentication

One authentication process powered by risk analytics and anchored by device trust

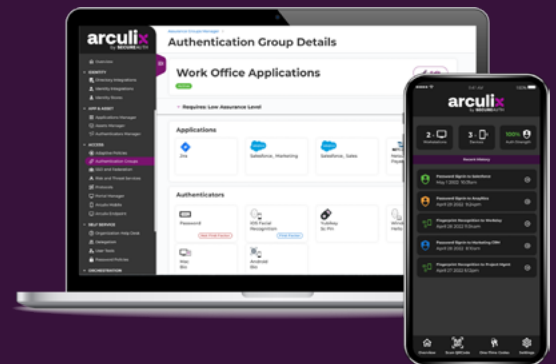

Enable hack-proof /
invisible MFA

Eliminate passwords;
Go beyond passkeys

Simplify audits, UX, and
policy creation

Customer Proof Points

See how our customers were able to eliminate MFA vulnerabilities, mitigate risk, and delight users with one solution from Arculix.

“Arculix’s Passwordless capabilities eliminated MFA fatigue and saved us \$700K / year in helpdesk costs related to lost passwords.”

F500 Online Drugstore

“In the past year, we easily enabled 95% of our workforce with Arculix’s invisible MFA to reduce data breaches and ATO.”

e-Commerce Giant

“We saved \$450K / year in savings from reduced ATO and credential stuffing. Fraud loss is reduced to .02% by deploying Arculix.”
